

SHUYING DAI

+1 213-255-9521 | shuyingd@usc.edu | www.linkedin.com/in/shuyingdai | <https://shuying-portfolio.vercel.app>

EDUCATION

- University of Southern California**, M.S. Healthcare Decision Analysis Expected Graduation: May 2027
- HEOR, RWE Analysis, Healthcare Policy & Market Access, Statistical Modeling, Healthcare Innovation & Commercialization
- University of Toronto**, B.S. Bioinformatics, Minor in Data Science Graduation: Apr 2025
- Genomics, Computational Biology, Machine Learning, Biostatistics, Data Science

PROFESSIONAL EXPERIENCE

- GBCS Group**, Commercial Strategy & Market Intelligence Intern Mar 2026 – Present
- Assessed market attractiveness and commercialization feasibility for Orion Aviation's fleet management software across a 11.2B addressable market, shaping the product's go-to-market thesis.
 - Conducted commercial due diligence across 15+ aviation software providers and industry sources, identifying pricing opportunities, adoption barriers, and customer segments to inform market-entry and pricing strategy.
 - Built ROI models quantifying 18–37% operating-cost reductions, \$250K annual savings, and ~150% ROI, supporting commercialization and customer adoption decisions.
- BCG Mentorship Project**, Healthcare Market Strategy Analyst Jan 2024 - May 2024
- Evaluated JADA's China market opportunity through market sizing, competitive benchmarking, and stakeholder research, assessing a \$50M+ intervention market across postpartum hemorrhage treatment and adjacent hospital segments.
 - Assessed regulatory, reimbursement, and market-access pathways through 3,000+ clinician, policy, and market-access stakeholder interviews, identifying the primary barriers to physician adoption and hospital uptake.
 - Developed go-to-market recommendations on approval strategy, hospital targeting, and pricing, prioritizing top-tier maternity hospitals representing >30% of national delivery volume for initial launch.
- Chinese Academy of Sciences**, Biomedical Data Analyst Intern Apr 2023 - Dec 2023
- Applied Python and R bioinformatics pipelines to 10,000+ patient genomic datasets, identifying 50+ candidate biomarkers and 21 disease-associated pathways.
 - Integrated genomic findings with clinical evidence to validate 12 biomarkers and characterize molecular disease subtypes, advancing translational oncology research.
 - Translated complex genomic analyses into actionable recommendations that enabled multidisciplinary teams to prioritize biomarker candidates for downstream study.

PROJECT EXPERIENCE

- Biotech Investment Thesis** | Structure Therapeutics NASDAQ: GPCR May 2026 - Present
- Built an investment thesis on Structure Therapeutics, issuing a conditional buy on aleniglipron, a Phase 3-ready oral GLP-1 with best-in-class potential in the \$100B+ obesity market.
 - Conducted clinical and regulatory diligence supporting the thesis, evaluating Phase 2 efficacy (16.3% placebo-adjusted weight loss) and safety data across 625+ patients against oral and injectable competitors.
 - Modeled cash runway and financing scenarios, confirming \$1.46B in liquidity funds operations through the 2028 Phase 3 readout, weighed against execution and competitive timing risks.
- Obesity Therapeutics Market & Value Assessment** | Wegovy vs Zepbound Apr 2026 - May 2026
- Conducted a HEOR cost-effectiveness analysis of Wegovy versus Zepbound, translating clinical and economic findings into pricing and market-access recommendations for obesity therapeutics.
 - Built Markov and decision-tree models incorporating treatment costs, adverse events, QALYs, and long-term outcomes, estimating an incremental cost-effectiveness ratio (ICER) of ~\$335,000/QALY for Zepbound versus Wegovy.
 - Ran sensitivity analyses across pricing, adherence, and efficacy assumptions, finding a 20% price reduction lowered the ICER below the \$150,000/QALY willingness-to-pay threshold.

SKILLS

- Investment & Commercial Evaluation** | Investment Thesis Development, Commercial Due Diligence, Scientific Due Diligence, Market Opportunity Assessment, Competitive Intelligence, Financial Analysis
- Healthcare & Life Sciences** | Clinical Data Analysis, HEOR, Market Access, Reimbursement Strategy, Real-World Evidence, Commercialization Strategy
- Tools** | Excel, PitchBook, CB Insights, SEC Filings Research, SAS, R, Python, SQL, Tableau
