

EDUCATION

University of Southern California, M.S. Healthcare Decision Analysis

Expected Graduation: May 2027

• HEOR, RWE Analysis, Healthcare Policy & Market Access, Statistical Modeling, Healthcare Innovation & Commercialization

University of Toronto, B.S. Bioinformatics, Minor in Data Science

Graduation: Apr 2025

• Genomics, Computational Biology, Machine Learning, Biostatistics, Data Science

PROFESSIONAL EXPERIENCE

GBCS Group, Commercial Strategy & Market Intelligence Intern

Mar 2026 – Present

- Evaluated market attractiveness, scalability, and commercialization potential across three technology products through competitive benchmarking, customer segmentation, and market opportunity assessments, informing strategic growth recommendations.
- Conducted competitive intelligence and market landscape analyses covering 15+ competitors and 20+ industry sources to assess industry structure, adoption drivers, and competitive positioning.
- Developed commercialization and pricing strategies by integrating customer segmentation, value proposition design, competitor benchmarking, and adoption pathway analyses.
- Assessed strategic partnership opportunities across 30+ vendors using a weighted diligence framework evaluating market expertise, technical capabilities, and execution risks.
- Built customer adoption and ROI hypotheses to evaluate demand drivers, customer economics, and key assumptions underlying market-entry and growth strategies.

BCG Mentorship Project, Healthcare Strategy Project Analyst

Jan 2024 - May 2024

- Evaluated the commercial opportunity of the JADA postpartum hemorrhage device in China through market sizing, hospital adoption analyses, competitive landscape assessments, and stakeholder research.
- Assessed regulatory, reimbursement, and market-entry risks affecting long-term commercialization potential, adoption dynamics, and strategic launch planning.
- Synthesized insights from 3,000+ physician, hospital, and stakeholder interviews to identify key adoption barriers and value drivers.
- Analyzed competitive products, unmet clinical needs, physician demand, and healthcare system dynamics to support market-entry strategy development.
- Developed strategic recommendations presented to stakeholders regarding registration pathways and commercialization priorities.

Chinese Academy of Sciences, Biomedical Data Analyst Intern

Apr 2023 - Dec 2023

- Analyzed 10,000+ patient genomic datasets to identify biomarkers and disease-associated molecular signatures relevant to oncology research.
- Conducted pathway enrichment and molecular network analyses to identify disease mechanisms, biomarker candidates, and potential therapeutic targets.
- Presented research findings and biological insights through literature reviews, data interpretation, and scientific reports supporting translational research initiatives.
- Performed end-to-end bioinformatics workflows including data cleaning, statistical analysis, and interpretation of large-scale biomedical datasets.

PROJECT EXPERIENCE

Biotech Investment Thesis | Structure Therapeutics (NASDAQ: GPCR)

May 2026 - Present

- Conducted a comprehensive investment assessment of Structure Therapeutics, evaluating scientific differentiation, clinical evidence, commercial opportunity, and competitive positioning within the obesity therapeutics market.
- Analyzed Phase 2 clinical data, SEC filings, and management communications to assess efficacy, safety, regulatory readiness, and key development risks.
- Developed an investment recommendation supported by scenario analysis, market opportunity assessment, financial runway evaluation, and competitive benchmarking against Eli Lilly, Novo Nordisk, and other GLP-1 developers.
- Identified key catalysts, diligence priorities, and downside risks influencing long-term value creation and commercialization potential.

Obesity Therapeutics Market & Value Assessment | Wegovy vs Zepbound

Apr 2026 - May 2026

- Evaluated the long-term clinical and economic value of leading obesity therapies to assess commercial adoption potential and payer value proposition.
- Built a health economic model incorporating treatment efficacy, costs, adverse events, patient outcomes, and transition assumptions to compare competitive positioning and long-term value creation.
- Conducted sensitivity analyses to identify key value drivers, reimbursement risks, and market access considerations.
- Generated evidence-based recommendations regarding commercialization opportunities, payer adoption dynamics, and long-term market competitiveness.

SKILLS

Healthcare & Life Sciences | HEOR, Market Access, Health Economics, Reimbursement Strategy, Clinical Evidence Assessment, Real-World Evidence**Investment & Commercial Evaluation** | Market Research, Competitive Intelligence, Commercial Due Diligence, Market Sizing, Opportunity Assessment, Financial Modeling, Valuation Analysis**Analytics & Modeling** | Excel, Financial Analysis, Sensitivity Analysis, SAS, R, Python, SQL, Tableau**Biomedical Sciences** | Genomics, RNA-seq Analysis, Molecular Biology, Translational Medicine, Precision Medicine
